

right here in Ocala that we don't find it necessary to travel more than 20 miles. It is more time-efficient and cost-effective not to travel very far from our base of operations in SW Ocala.

Among the many services On Budget Tree Service offers are:

Tree trimming and selective pruning: Think of tree care as an investment. A healthy tree increases in value with age and pays big dividends by increasing property values, beautifying our surroundings, providing shade and purifying our air, just to name a few benefits. Proper trimming and pruning is necessary to remove dead, diseased, hanging limbs or insect or mistletoe infested branches. A proper tree trim can last several years. An improper trim can easily kill a tree.

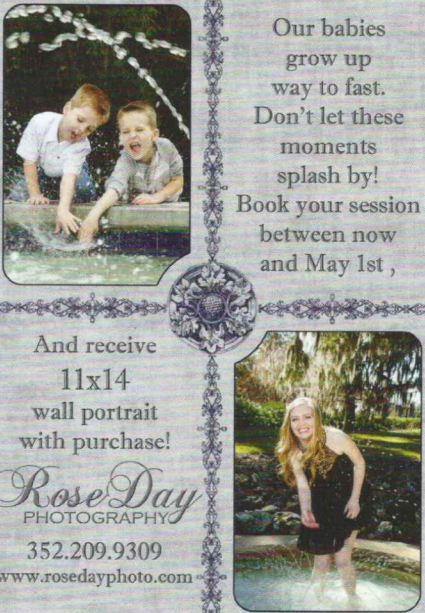

Tree removal and stump grinding: The company safely removes

unwanted trees, even in the most difficult or dangerous circumstances.

Spanish moss treatment: Did you know one pound of Spanish moss can hold up to two or more pounds of rainwater, becoming three pounds. If a tree has 500 pounds of dry Spanish moss hanging from it, once it rains it becomes 1,500 pounds. Add the power of wind in a thunderstorm and possible hurricane strength winds, and the tree can suffer significant damage. Thinning or eliminating Spanish moss makes sense, whether you pull it or spray it. ■

For more information on quality professional tree service, landscaping or anything pertaining to the beautification of your property, call Teresa (or Trees-a) Wheeler of On Budget Tree Service at 352-322-6305. Free estimates and expert consultation are available. Visit their

website (OnBudgetTreeService.com) and click on the blog section for useful tips and articles.
